**Subject:** Vote Yes on North Shoreview Flood Improvement Project

Dear Mayor Goethals and members of the City Council,

The North Shoreview Flood Improvement Project will protect our neighborhood from future flooding, and it is very important that you, the City Council, support the city staff's recommendations on how to move forward with it today.

Please support the city staff's recommendation to negotiate a contract with more favorable terms with the lowest responsible bidder, Anderson Pacific Engineering Construction. Because the COVID-19 outbreak will likely lower some construction costs over the coming two-year implementation of the project, we should take the measures recommended by the City's staff to safeguard our city finances while ensuring this project proceeds on its promised timeline.

A 'yes' decision today will allow the City to move forward with the project now, while saving the city money in what will likely be an uncertain economic time for the City.

Taking this action will allow people in our neighborhood to save a lot of money, who are already taxing themselves and who will no longer have to pay high flood insurance premiums. This is a needed investment in our neighborhood's sustainable and resilient infrastructure, and moving forward tonight will keep our promised timeline.

Sincerely,  
Dan Phan

**Subject:** FEMA Flood Zone, North Central San Mateo

Dear Mayor Goethals and members of the City Council

The North Shore view Flood Improvement Project will protect our neighborhood from future flooding as well as protecting our pockets from high cost Flood Insurance. It is important that you, the City Council, support the city staff's recommendations on how to move forward with it today.

Please support the city staff's recommendation to negotiate a contract with more favorable terms with the lowest possible bidder, Anderson Pacific Engineering Construction.

A 'yes' decision today will respect the promised timeline, protect our neighborhood from flooding, eliminate the requirement for expensive flood insurance, and save people here in North Central a lot of money.

Sincerely yours,
