

## Letter of Streetlight Agreement

Dear Valued Customer,

As we approach the beginning of your Rule 20A project, one issue that you will need to address is your choice of the available streetlight options. The streetlights located within the Rule 20A project are currently Customer owned and on Rate Schedule LS2.

Since the existing streetlights are Customer owned, you as the streetlight owner will be responsible for the cost to underground the streetlights. A portion of your streetlight undergrounding cost will include a share of the joint trenching costs (based on the conduit occupancy of the joint trench) and streetlight conduit installation costs should you choose to participate in the joint trench. When estimating begins we will provide you with an approximate cost of this portion of your streetlight conversion costs for your budgeting purposes. You will also be responsible for any connection and removal costs associated with your existing streetlights. All of the provisions of customer owned streetlights also apply to traffic signals (rate schedule TC1) and outdoor lighting (rate schedule OL1).

Please note that the existing streetlights and supporting overhead electrical system cannot be removed prior to the new streetlights being installed and energized. If you choose to perform the streetlight work yourself, then the new streetlights should be installed and ready to be energized prior to the completion of trenching. Streetlight standards lead times can be three to four months, so please coordinate your work to ensure the streetlights do not delay removal of the overhead system.

Please check the boxes below that represent how your community would like to proceed regarding streetlights.

- ☐ Streetlights will remain on existing wood poles.
- ☐ Install new galvanized steel streetlight poles at our expense.
- ☐ We choose to purchase and install our own new streetlights poles.
- ☐ We choose to participate in the joint trench installing our own streetlight conduit.
- ☐ We choose to participate in the joint trench, but would like PG&E to install our streetlight conduit.
- ☒ We choose not to participate in the joint trench, and instead will do our own trenching for streetlights.

**I request PG&E to proceed with the design of this project based on the above marked choices and understand I will have a chance to review the estimate prior to agreeing on any associated cost. If applicable, contracts will be executed based on the above decisions and associated cost.**
