Per Section 2.16 Method of Award
 Bids may be awarded by the participating BACC agencies to the lowest, responsive, and responsible bidder for each listed region, meeting the specifications for bulk loads for the chemical. The lowest responsive bidder for this chemical will be determined for each region, listed on the Bid Form. The bidder that meets the specifications and submits the lowest overall bid price for a particular region may be awarded the bid by the participating agencies in that region, assuming the bid is determined by BACC to be complete and in compliance with the bid requirements. The lowest overall bid price for each region will be determined by multiplying the estimated annual quantity for each participating agency within the particular region by the bid prices for the region, and adding up the aggregate cost. BACC has the right to delete terms or options from the bid contract documents and reserves the right to reject any and all bids and to waive irregularities in said bids.
