**Q1** **Electric battery-powered**

What type of leaf blowers do you use? (Check all that apply)

**Q2** **Environmental concerns,**  
**Noise, electric equipment is quieter than gas equipment**  
 ,  
**Health impacts,**  
**Client preference**

**Q3** **There are no disadvantages of electric leaf blowers**

What are the disadvantages of using electric leaf blowers? (Check all that apply)

**Q4** **I already use electric leaf blowers and did not need to change my business practices**

How has the banning of gas leaf blowers in other cities affected your business?

**Q5** **No**

Do you think time of use restrictions (e.g. limiting leaf blower use to only 1 day per week in specific neighborhood zones) would have an impact on your business? This approach is similar to Burlingame's leaf blower regulations.

**Q6**

Please provide any additional feedback about these potential regulations:

Setting aside my landscape use of an electric blower, only periodically, I find myself barraged in my neighborhood by loud, smelly leaf blowers at all hours of the day, early morning, into the evening when my family wants to enjoy quiet time in the garden....I would love for them to be used only at certain times, especially gas, but both if possible.

**Gas,**  
**Electric battery-powered**

**Q2**

If you use electric leaf blowers, why do you use electric leaf blowers? (Check all that apply)

**Other areas I work have banned gas leaf blowers**

**Q3**

What are the disadvantages of using electric leaf blowers? (Check all that apply)

**Battery charge does not last long enough,**  
**Electric leaf blowers are not as strong as gas leaf blowers**  
 ,  
**Cost of purchasing new electric equipment,**  
 Other (please specify):  
 Batteries when used for long periods of times drain and damage cells within the batteries resulting in replacing \$200 batteries regularly.

**Q4**

How has the banning of gas leaf blowers in other cities affected your business?

**I purchased electric leaf blower equipment to meet gas leaf blower ban requirements**

**Q5**

Do you think time of use restrictions (e.g. limiting leaf blower use to only 1 day per week in specific neighborhood zones) would have an impact on your business? This approach is similar to Burlingame's leaf blower regulations.

Yes, please explain:  
 My schedule is based on efficiency and not by city. Most of my clients hve set days they prefer me and this would ultimately ruin my schedule and make unnecessary trips back in forth.

**Q6**

Please provide any additional feedback about these potential regulations:

Palo Alto's policy for electric leaf blowers only have already shown stress on landscapers. They are paying out of pocket to repair and buy new electrical equipment and struggle to keep up with buying expensive batteries due to their lack of longevity. Most have stuck to only raking making their hours longer and more physically draining.

Other (please specify):  
 easier to use, cheaper than gas, just as effective

**Q3** **Battery charge does not last long enough**

What are the disadvantages of using electric leaf blowers? (Check all that apply)

**Q4** **I already use electric leaf blowers and did not need to change my business practices**

How has the banning of gas leaf blowers in other cities affected your business?

**Q5**

Do you think time of use restrictions (e.g. limiting leaf blower use to only 1 day per week in specific neighborhood zones) would have an impact on your business? This approach is similar to Burlingame's leaf blower regulations.

Yes, please explain:  
 I work 5 days a week and am only at clients homes 1x per week. I would have to do every client's blowing in one day which leaves 4 days when I could not work. Also, for construction, leaf blowers are used for daily cleanup. Jobsites would get messy if they could only be used one day.

**Q6**

Please provide any additional feedback about these potential regulations:

I think electric blowers are fine and should be allowed to be used any day of the week. In general, I think leaf blowers should be used less frequently than they are - raking is a better way to remove targeted debris and leave beneficial organic matter in garden beds. However, blowers are important for thoroughly cleaning hardscaped surfaces like patios, driveways and sidewalks. I am a professional horticulturist and have strong opinions about the overuse of blowers and their detriment to garden health, but they have their place and should be allowed.

 Battery charge - I wouldn't be able to do all of my clients.

**Q4** **I no longer serve areas where gas leaf blowers are banned**  
 How has the banning of gas leaf blowers in other cities affected your business?

**Q5** Yes, please explain:  
 Do you think time of use restrictions (e.g. limiting leaf blower use to only 1 day per week in specific neighborhood zones) would have an impact on your business? This approach is similar to Burlingame's leaf blower regulations. When I would work in Burlingame I'd have to move around too many clients schedules which resulted in negative/upset clients so I had to let go all of my Burlingame clients

**Q6**

Please provide any additional feedback about these potential regulations:

I use my gas leaf blowers to not only clean residential yards, but the streets and clear the drains near my clients' homes, as I know the majority of other gardeners do. We keep the streets clean and if I have to use a battery/electric leaf blower, it would take too much time of my battery and time to continue to do the same amount of work.

I'm the boss and worker so that would mean I would have to let go some of my clients. I can only do so many yard per day.

**Q6**  
 Please provide any additional feedback about these potential regulations:  
 While watching the 11/09/22 Sustainability + Infrastructure Commission meeting I learned about the California CORE program. I just started the process in January. I was told it has been taking 3 months to have it finalized.  
 The current enforcement of the leaf blower ordinance is a joke. If you want any new regulation to work you will have to have a new team that just handles the leave blower ordinance and actually do enforcement. In the past I would report leaf blower ordinance violations but I stopped after seeing the same crews continuing with the same violations.

**Client preference,**  
**Other areas I work have banned gas leaf blowers**

**Q3**

What are the disadvantages of using electric leaf blowers? (Check all that apply)

**Battery charge does not last long enough,**  
**Electric leaf blowers are not as strong as gas leaf blowers**

**Q4**

How has the banning of gas leaf blowers in other cities affected your business?

**I purchased electric leaf blower equipment to meet gas leaf blower ban requirements**

**Q5**

Do you think time of use restrictions (e.g. limiting leaf blower use to only 1 day per week in specific neighborhood zones) would have an impact on your business? This approach is similar to Burlingame's leaf blower regulations.

Yes, please explain:  
 Dias especiales es algo super ridiculo como en Burlingame, es un dolor de cabeza.

**Q6**

Please provide any additional feedback about these potential regulations:

- \*Porque no trabanjan con el fabricante y no con el pobre trabajador?
- \*Tengan en cuenta que fall y winter es desagradable usar electric super batt tools.
- \*Please don't do like Burlingame, is a headedge to re schedule our long time routes.

English Translation:

- \* Why don't they work with the manufacturer and not with the poor worker?
  - \*Keep in mind that fall and winter is unpleasant to use electric super batt tools.
-
